

How to re-assign the firmware on V4 instrumentation:

1. Verify unit is powered on and has the markings above to identify a V4 (4.00) hardware set.
2. Press & hold Power and [F] to enter full setup.

3. Press the Zero Key repeatedly to get to: 'FACTry'.

4. Press the Tare key 3X to get to "APP id".

5. Press the Select key once to show the current firmware selected.

6. Use the print key to toggle to the firmware you would like to change to. Press the [F] key to save new selection.
7. Press Tare key once to go to: 'L.COdE'.

8. Press the Select key to bring up the current firmware selection and then the code will be prompted:

9. Use the Select Key and the Print Key to enter the pass code. Use the [F] key to accept. To finish the configuration go to END pressing the Zero Key multiple times and then press Tare to save & exit.
