

To all Rinstrum Verification Officers:

This newsletter covers the following topics:

1. Rinstrum MCA Requirements and Policy
2. R400 Certificate Update

1. Rinstrum MCA Requirements and Policy (X00A-873)

- An MCA policy document has been created to clarify items between RVO companies and Rinstrum to acknowledge the following topics.
 - Authority to perform Manufacturer Conformity Assessment on behalf of Rinstrum
 - MCA Clarification and Rejection
 - Training for RVOs
 - Declaration of Conformity
 - Pricing completed as part of RVO Company Agreement
- The key difference is that failed MCAs will be charged the standard fee under the new policy and then a set fee (50 Euro) for a resubmitted MCA. Therefore, MCAs should be fully reviewed before submission. **(MCA-RESUBMIT – MCA Resubmission Fee)**
- The policy document is attached with this newsletter ([Click to Download](#)), any questions please email or contact us. It will take effect from 1 August 2021.

2. R400 Certificate Update

- The NMI EC type-approval certificate T6822 (R400-811) for R400 series indicators has been updated and is in effect from 9th July 2021.
- The OIML Test Certificate TC6821 (R400-810) for R400 series indicators has been updated and is in effect from 16th July 2021.
- The main change is that the certificate now covers the full R400-Series models (including R420, R423, R427 and R457)
- The new EC type-approval certificate can be downloaded from [here](#).
